UTILITY SHEDS

COOPERATIVE
FARM BUILDING

Plan No. 6100

(2 SHEETS)

PLAN EXCHANGE

U. S. DEPT. OF AGRICULTURE
NATIONAL AGRICULTURAL LIBRARY
RECEIVED

SEP 9 1971

PROCUREMENT SECTION
CURRENT SERIAL RECORDS

The plan for the utility shed illustrated above was developed at the University of Connecticut, Storrs. The shed is one of many different designs, some of which are shown on the back page of this sheet.

WASHINGTON, D.C.

Working drawings for the sheds include a list of materials needed for construction.

The plan is for panel-type construction: The 2-by-4 framing is covered with exterior-type plywood panels and is secured to a 4-inch-thick concrete-floor slab with two anchor bolts per panel.

In some areas, building permits are required for this type structure. Consult your local building authorities before starting construction.

Complete working drawings may be obtained from the extension agricultural engineer at your State university. There may be a small charge to cover cost of printing.

If you do not know the location of your State university, send your request to Agricultural Engineer, Extension Service, U.S. Department of Agriculture, Washington, D.C. 20250. He will forward your request to the correct university.
